Congratulations on your new gas unit. We are sure you will get years of enjoyment and warmth from your purchase.

Below is important information. Please sign and date the bottom of the page, indicating that you have read and understand the information.

I/we have been informed of the following:

1. Stove Place II fees DO NOT include the plumber's or electrician's fee.
2. Payment in full (C.O.D.) is expected at the time of installation. We are not responsible for unfinished work by other contractors.
3. If you are using your gas plumber to hook up your unit, he must be there at the time of installation or a \$125 we will added to your statement to cover lost time.
4. Free standing gas stove BLOWERS are optional.
5. Due to the damp Cape Cod environment and the fact that spiders are attracted to the odor of gas, we recommend that you leave your Pilot Light on all 12 months of the year to avoid creating an environment that can shorten the life of parts.
6. White streaks on glass: This is a normal occurrence. It is caused by a combination of moisture and chemicals that are in the gas. A ceramic glass cleaner must be used and is available to purchase at our store. Please consult your unit's instruction manual on how to remove the glass or call us and make an appointment for one of our service technicians to clean it.
7. Your unit needs to be maintained every 3 - 4 years (2-3 for propane) Please put a reminder on your calendar to **call us** in the "OFF" season - March to August to set up an appointment with one of our trained technicians.
8. **Dennis Residents:** Your unit will not be running after the installation. The Town's Gas Inspector will be notified by the plumber to conduct a final inspection. The plumber will return to fire off the unit.
